Salt Lake City, UT.

## SUMMARY

Passionate Software Developer and Team Lead with experience meeting objectives with quality deliverables from an Agile methodology.

## WORK EXPERIENCE

### **Software Developer, FabriQ - May 2019 - Present - Farmington, UT. ([tryfabriq.com](http://tryfabriq.com))**

- Developed Electron.js-based Desktop application with React.js, Node/Express API, and PostgreSQL
- Created hosting site & company web profile/download site for app with WordPress using PHP
- Utilized Agile Methodology and Scrum to organize a product roadmap and 2-week sprints to deliver enhanced features & functionality in a rapidly changing environment spurred by continuous customer feedback.

### **Freelance Software Developer - November 2018 - April 2019 - Salt Lake City, UT**

- Developed mobile goal-tracking application for local Salt Lake City client for iOS and Android in React Native.
- Set up weekly progress meetings and set up data analysis tools for client to view customer demographics and organize company plan accordingly

### **IT/Project Implementation Manager - Caffey, Inc. - January 2014 - August 2018 - Biloxi, MS.**

- Liaison between Design-Build Team at company office and field projects, assuring timely solutions for prep & delivery of \$10M+ worth of Medical Diagnostic Imaging equipment across the U.S. including Nuclear Medicine Systems and Radiology Applications. Tasked with maintaining project schedule, budget, & scope.
- Maintained Office HQ hardware and software implementations including Microsoft Active Directory, Server, Dell SonicWall VPN integration and bug fixes/issues.
